

AABC

Register of Architects Accredited in Building Conservation

AABC MENTOR SCHEME ACTIVITY PROGRAMME

To be completed annually by apprentice in consultation with mentor.

Mentee:		Mentor:		
Date of commencement of mentorship:		Target date for AABC application:		
Activity programme for year from <i>dd/mm/yy</i> to <i>dd/mm/yy</i>				
	Competence (Refer AABC Guidance Notes for Applicants, and AABC Guide to Conservation Skills)	Familiarity and identification of deficiencies	Planned activities in forthcoming year to enhance skills (i.e. opportunities for project experience, attending formal conservation courses, CPD, reading etc)	Progress and achievements in current year
1	Understanding conservation philosophy, conservation legislation and the significance of subject buildings in whole and in their constituent parts.			
2	Identifying defects, their causes and, in the case of adaptive works, functional deficiencies.			

3	Formulating proposals for repair, remediation and, where appropriate, adaptation which are philosophically and technically sound, explaining the impacts of any changes.			
4	Documenting investigations and proposals using reports, drawings, specifications, schedules and photographs.			
5	Managing conservation works including procurement, cost and quality control both on and off site.
